

West & Central Africa MPLS Offer

Fully redundant MPLS offering for West & Central Africa

High availability for critical applications is the heart of all enterprises connectivity. Gilat Telecom's MPLS West & Central Africa network, is the perfect solution that promises 100% uptime.

African data stays in Africa

By deploying local MPLS nodes in main cities in west Africa, and connecting them to each other, all data stays in West and central Africa. In addition, we optimize your data delivery – no data is transferred to Europe in order to travel back, promising lowest latency.

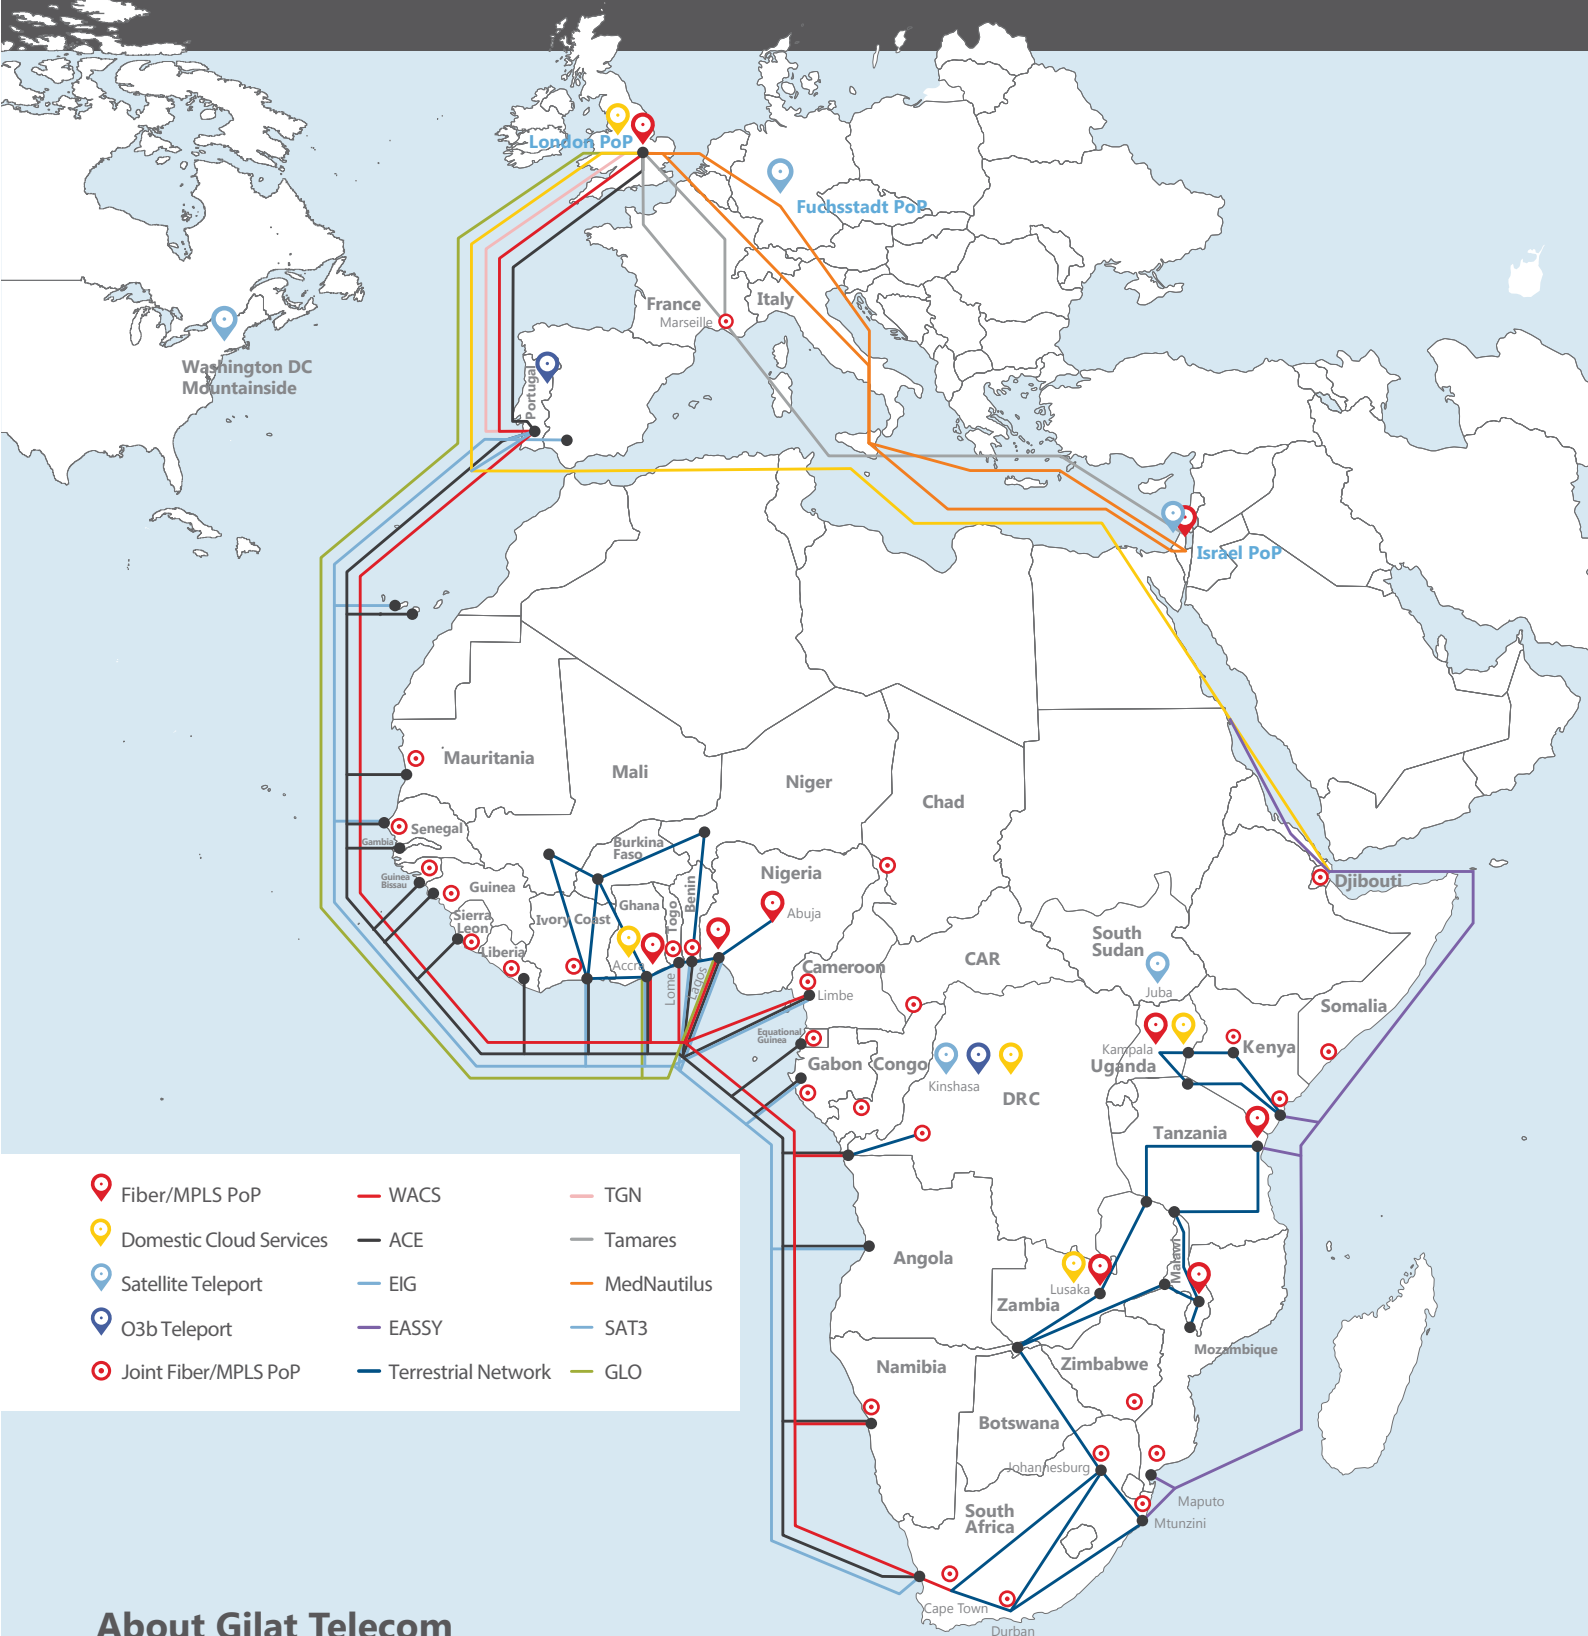

MPLS networks supported by the top MPLS telecom operators in the region

We have combined our resources with Africa's leading MPLS operators to provide secure and reliable coverage across the entire West and Central Africa.

Main features of Gilat Telecom's West and Central Africa MPLS offering:

- Use of multiple submarine cables: ACE, WACS, SAT3, GLO1
- Multiple terrestrial cables
- Full mesh MPLS top topology
- Delivery of MPLS L2 Ethernet and MPLS L3
- Last mile delivery over fiber and radio, or both
